

In each of the last 11 years, corporate-identified holiday ornaments have become THE highest volume custom product that we run over the course of a year. Approximately 50% of all companies and organizations who order them once, order them again...and again.

Ornament layouts are more effective when the logo plays a support role to the designwork that your recipients will appreciate. It may be a winter landscape; holiday icons; company images; a new product; something whimsical; or a local church....there's no limit.

All ornaments include descriptive copy on the backside, with the option for sequential numbering, as well. They only weigh about 1.25 oz. and, even better, they won't break when you drop them!

Need artwork to show a series of ornaments for the next 3 years? We're happy to do that! So let us take the "holiday gift monkey" off your back this year...and for years to come.

Options (P)
